

ALI JAMALI

DATA ANALYST | DATA ADMINISTRATOR | SQL & REPORTING

Coquitlam, BC | 778-908-6218 | alirezajamali.ca@gmail.com | alirezajamalica.github.io

PROFESSIONAL PROFILE

Reliable and analytical IT professional with extensive experience supporting data, reporting and technology environments in healthcare settings. Brings a strong background in working with complex information, identifying and resolving data issues, supporting business and operational needs, and collaborating with technical teams and end users. Known for accuracy, problem-solving, attention to detail and the ability to manage information in structured and organized environments. Seeking opportunities in Data Analysis, Data Administration, Database Support, Reporting or related data-focused roles.

SELECTED DATA & REPORTING PROJECTS

Centralized Multi-Hospital Data Environment: Aggregated, validated and prepared reporting data and KPIs across approximately 20-25 hospitals, supporting centralized processing and management reporting

HIS Data Migration: Migrated legacy data through staging, mapping, cleansing, transformation, character normalization, validation, cutover support and post-migration verification

Physician Compensation System: Built a C# and SQL Server application that processed physician service data, applied business rules, calculated payments and supported reporting across approximately 20 hospitals

Laboratory Information System Integration: Developed a C# and SQL Server interface that exchanged worklists and laboratory results between HIS and laboratory systems and validated returned data

API / Windows Service Integration: Developed services and integrations to receive external data, validate and process it, and store the results in SQL Server

TECHNICAL SKILLS

- | | | |
|--------------------------------|------------------------------|------------------------|
| - Microsoft SQL Server | - migration & data integrity | - Entity Framework |
| - SSMS, T-SQL | - indexing & performance | - Windows Services |
| - stored procedures, functions | - troubleshooting | - REST/API integration |
| - SQL Server Agent | - reporting datasets | - Windows Server |
| - backup/restore | - healthcare KPIs & SAP | - Active Directory & |
| - data extraction | - Crystal Reports | - VMware ESXi |
| - cleansing & validation | - operational and financial | - Veeam Backup and |
| - reconciliation & | - reporting | - TCP/IP |
| - transformation | - C# & Windows Forms | |

Core Skills

- Strong analytical thinking and methodical problem-solving
- Excellent attention to detail, accuracy and data quality
- Organized and able to manage large volumes of information
- Skilled at identifying inconsistencies and investigating issues
- Strong documentation and record-management practices
- Able to interpret requirements and communicate technical information clearly
- Collaborative and experienced working with users, technical teams and stakeholders
- Reliable, adaptable and comfortable working independently or as part of a team
- Strong time management and ability to prioritize competing tasks
- Experienced supporting users and providing clear guidance and training

PROFESSIONAL EXPERIENCE**IT Specialist** (project base) | Dian Computer Services, Coquitlam, BC 2023-Current

- Provide project-based IT support for computer systems, software and user technical issues
- Install, configure and troubleshoot Windows systems, applications and network connectivity
- Support data backup, recovery, file management and system maintenance activities
- Diagnose hardware, software and performance issues and recommend appropriate solutions
- Assist clients with system setup, updates, security and general technical support
- Document technical issues, completed work and solutions for follow-up and future reference

Software Developer-Data & SQL | Shahid Beheshti University of Medical Sciences, Iran 2021-2023

- Supported SQL Server and T-SQL data environments across 20-25 hospitals
- Extracted, consolidated and validated data to improve quality and reporting accuracy
- Developed T-SQL queries, reporting datasets and healthcare KPIs
- Supported data processing, SQL troubleshooting and performance review
- Developed a C# application used by 20 hospitals for physician compensation processing
- Collaborated with hospital and technical teams to resolve data issues

Healthcare Software & Data Systems Specialist | Mofid Children's Hospital, Iran 2013-2021

- Supported SQL Server databases and HIS applications in a busy healthcare environment
- Developed T-SQL queries, stored procedures, functions and Crystal Reports
- Investigated database, application, data-processing and performance issues
- Performed data validation, report troubleshooting and database support
- Supported SQL Server backup, recovery and system continuity
- Developed C# healthcare applications, integrations and data interfaces

Hospital Information System Support Specialist | TrTCo/Tiraj Healthcare Software Co., Iran 2008-2013

- Implemented and supported SQL Server-based hospital systems across multiple sites
- Migrated and validated legacy hospital data using staging, mapping and cleansing
- Created clinical, financial, operational and management reports using T-SQL and Crystal Reports
- Provided remote and onsite database/application support and coordinated issue resolution

IT Specialist | Mahdiah Hospital, Iran 2006-2008

- Supported SQL Server data, queries and SAP Crystal Reports
- Provided hospital IT/application support and coordinated data and system issues with the HIS vendors

EDUCATION & CERTIFICATIONS**Microsoft Certified: Azure Data Fundamentals (DP-900)** | Vancouver, BC 2026**Discovering SAP Crystal Reports** | SAP | Vancouver, BC 2025**Bachelor of Science in Information Technology** | University of Applied Science and Technology, Iran 2015

PROFESSIONAL DEVELOPMENT

- Continued learning in Microsoft Power BI
- Continued learning in Microsoft data and database administration, including the Azure Database Administration pathway and Microsoft Fabric/data topics
